

About Us

Twenty-two partners from four different countries (Greece, Sweden, Spain, and Italy) joined forces to establish a European multi-level innovative and constantly growing Centre of Vocational Excellence – the AccessCove – in the field of accessibility for individuals with disabilities. Through the development of the most up-to-date, valid and worth-trusting source for accessibility issues, AccessCove will constitute a key contributor to policy-making regarding inclusion in society and accessible digitalisation.

European Centre of Vocational Excellence in Accessibility

Co-funded by
the European Union

Objectives of AccessCove

- 1 Establish an innovative European Centre of Professional Excellence.
- 2 Found two new professional specialisations: the Accessibility Certifier and Accessibility Consultant with the aim of provide solutions to the accessibility problems faced by numerous enterprises, companies and public and private sector entities.
- 3 Address accessibility in a comprehensive way by spreading accessibility in all possible aspects of social and economic life.
- 4 Develop the most up-to-date, valid and reliable source for accessibility issues.
- 5 Build a strong network of partners who unify their expertise in delivering professional training, accessibility research or entrepreneurship.

Working method

Accessibility will be addressed in a holistic way, starting with the investigation of end-user requirements and continuing with the investigation of stakeholders' accessibility needs and priorities.

The data collected will aim to shape VET curricula and lead to the creation of a training framework and the certification of two new specialisations: the Accessibility Certifier and the Accessibility Consultant.

Additionally, AccessCove activities are aimed at upgrading and retraining the skills of specific target groups as well as secondary and higher education students.

Network

AccessCove allows your organisation to be part of a multilevel and international network to contribute to the elimination of social, economic and educational barriers for people with disabilities. If you want to participate in this project, you can contact us: accesscove@outlook.com.
