EMPOWERING ACCESSIBILITY FOR ALL: ACCESSCOVE

The European Centre of Vocational Excellence in Accessibility (AccessCoVE) focuses on developing skills and knowledge in Vocational Education and Training (VET) related to accessibility. It promotes equal access to places, products, and services, inclusive participation, and Universal Design principles. AccessCoVE aims to lead in European accessibility, influence inclusive policies, develop educational programs for future experts, and foster European partnerships to ensure equal participation for all.

WHO WE ARE

AccessCoVE is a consortium of 22 partners from Greece, Sweden, Spain and Italy, led by the University of Macedonia (Greece). Our mission is to create an innovative and continuously growing accessibility policy-making organisation.

INNOVATIVE OBJECTIVES

The AccessCoVE project aims to bridge the gap between planning and implementing accessibility solutions for individuals with disabilities. Its goals include:

- Establishing a European center for accessibility.
- Promoting a holistic approach to accessibility and creating two new professional specialties.
- Developing a partner network for regional development and sustainability.

OUR APPROACH

Our holistic approach to accessibility starts by researching citizens' needs and analyzing stakeholders' priorities. This comprehensive data collection shapes the development of our VET programs and curricula.

**Co-funded by
the European Union**
